DETAILED ACTION

This application is a continuation-in-part of U.S. Application Serial Number 09/534,966.

Claim 3 was previously canceled.

Claims 14-17 have been newly canceled.

Claims 1, 2 and 4-13 are currently pending.

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 17, 2006 has been entered.

Election/Restrictions

2. **Claims 4-11 stand withdrawn** from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on June 8, 2004.

Accordingly, **claims 1, 2, 12-17 are the subject of examination** in the present Office Action.

3. **In view of Applicant's amendment filed January 8, 2007 only the following outstanding grounds of rejection have been maintained.**

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 1, 2, and 12 stand rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter that was not described in the

Art Unit: 1644

specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. This is a NEW MATTER rejection.

It was previously stated: "Claim 1 has been amended to recite "wherein all of said plurality of complexes are recognizable by one CTL clone" in an attempt to differentiate the claimed invention from the prior art. Applicant asserts that the amendment is supported by the instant specification at page 51, lines 19-23; page 52, lines 1-3; Figures 3a-3b; page 46, lines 16-23 and page 47, lines 1-13. However, no disclosure germane to the amendments to the claims can be found on any of the pages cited. Furthermore, pages 51 and 46 do not even have a line 23. In regard to Figures 3a-3b, there is no disclosure of a plurality of complexes that are all the same and no disclosure of binding to the same CTL. The figures merely depict a protein band of a single size.

Accordingly, given that the amendments to the claim are not supported by the specification as asserted by Applicant, the amendments constitute new matter and must be removed."

Applicant's arguments filed January 8, 2007 have been fully considered but they are not persuasive.

Applicant argues that the added limitations do not constitute new matter and are fully supported by the specification at pages 42, 47-48 and 52-53. Applicant argues that these citations from the specification are sufficient support for "a plurality of complexes which are all the same (and therefore inherently recognizable by a single CTL clone)" at page 4 of the arguments filed January 8, 2007. However, this showing in the specification is different from the scope of what is claimed. A recitation of "all of said plurality of complexes are recognizable by one CTL clone" does not limit the complexes to being all the "same," only that they all bind to the same clone. The plurality of complexes disclosed at the cited passages of the instant specification, however, are products of the same coding sequence. More than just all binding to the same CTL, all of the complexes are structurally identical. Accordingly, the scope of Applicant's claimed plurality of complexes is not supported by the specification and the recitation is, in fact, new matter. The disclosure is limited to multiple copies of the same complex.

Conclusion

5. Claim 13 is allowed.

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing

Art Unit: 1644

date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
